Computer Aided Business Systems Limited
Professional CAD Services

You are in the process of making a decision to invest in the purchase of a computer aided design product. How do you intend to implement the software to make best use of the features and functions?

You are in the process of making a decision to invest in the purchase of a computer aided design product. How do you intend to implement the software to make best use of the features and functions?

Professional CAD Consultancy Services

Adopting the latest technologies and processes within design can bring major benefits in productivity, quality, efficiency and competitive position.

Computer Aided Business Systems consultancy services can help you understand your business critical issues and develop a plan to improve work processes, reduce risk and increase quality. Our consultants will work with you to develop important strategic insight which, when acted upon, will start to deliver immediate productivity gains. Our consultants' skills are based on industry experience both from within Computer Aided Business Systems and from working for or with clients.

Our experience shows that successful companies increase their return on investment by a realisation that software purchase is only the first step in the process to make them more competitive. Each organisation should create and continually evaluate a technology plan to include; software, custom add-ons, hardware, infrastructure, workflow, people skills, maintenance and support. Any of these areas that are not properly addressed can create bottlenecks, and therefore inefficiencies in the design process. As a leading design technology provider that understands your work processes, we can deliver real value to your organisation.

Talk to the experts 'us' about achieving an efficient and effective design environment.

Analysis

Whether your organisations goal is a more effective use of your existing CAD solution, or to migrate from a legacy solution, Computer Aided Business Systems can help you achieve significant productivity gains by developing and delivering a targeted plan of action.

Our consultants will work with you to discover where the most significant issues are in your organisation's design workflow and develop an appropriate technology proposal to resolve these issues. Drawing from extensive experience and a wealth of industry resources our team will create a plan aimed at realising improvements in your business.

Partnership

The Computer Aided Business Systems goal is to partner with our customers to develop the right shared objectives and plans; building a close working relationship to take forward people, process and products to deliver against those agreed goals.

Why Choose Computer Aided Business Systems

Computer Aided Business Systems Ltd is an Autodesk Value Added Reseller, working closely with Autodesk. We continually invest in people, training, quality procedures and support infrastructure, in compliance with the accreditation requirements. This accreditation guarantees you professional 'trusted advisor' advice and support.

Computer Aided Business Systems Limited have been an Autodesk Authorised Reseller since 1990, we have grown to know the CAD industry extremely well and are able to advise and investigate products that are best suited to your individual requirements and budget. Our team of sales, support and training is well established with over 50% of the company having 8 or more years service.

We have chosen to employ and recruit from the industry, and our backgrounds include a practicing architect, architectural technician, M&E designer and cartographer. Our technical and training team have progressed from drawing board, through using Autodesk products in a commercial environment to the services they offer today.

Computer Aided Business Systems Limited are an Autodesk Authorised Training Centre, providing Autodesk approved training to individuals and businesses, on scheduled or company specific courses.

Training Environment

Computer Aided Business Systems offer training environments which are quiet, air-conditioned rooms with task lighting, ergonomic seating, fully equipped with projector and one workstation per student. Which all helps create a relaxed environment conducive to learning.

Autodesk Certified Instructors

Computer Aided Business Systems trainers are Autodesk Authorised to maintain their product knowledge prior to the release of new or revised Autodesk products. This process is rigorously controlled by Autodesk and does not just involve product knowledge, but also their teaching and presentation skills so they can deliver the courses effectively.

Who are our Autodesk Authorised Trainers?

Computer Aided Business Systems trainers are consistently ranked by Autodesk in the highest echelon of their UK trainers.

Computer Aided Business Systems trainers are not just good at the theory - apart from delivering Autodesk training courses they are regularly involved with clients on consultancy, development and implementation studies which adds a strong practical element to their skills. They are naturally very good at communicating after all that is their chosen profession - so why not speak to one today about your specific training requirement

Autodesk Official Courseware

Using the latest Autodesk Official Training material means the training is up to date with the latest features and bound copies of the courseware can be purchased to retain after the course for future reference. We offer scheduled, company specific and workshop style courses, with adequate time allowed so that individual questions and requirements can be properly dealt with.

Guarantee of Training Quality

The performance of our Authorised Training Centre and Autodesk Authorised Instructors is continuously monitored by Autodesk. At the completion of all official courses, each delegate is requested to submit an online course evaluation form to the Autodesk Educational team. Delegates have an opportunity to provide feedback directly to the vendor, including feedback on the course, the materials and our appointed instructor. The feedback will be treated in total confidence by Autodesk, and they will act quickly on any issue detracting from an entirely positive experience.

Autodesk

Autodesk, Inc. is the world leader in 2D and 3D design software for the manufacturing, building and construction, and media and entertainment markets. Since its introduction of AutoCAD software in 1982, Autodesk has developed the broadest portfolio of state-of-the-art digital prototyping solutions to help customers experience their ideas before they are real. Fortune 1000 companies rely on Autodesk for the tools to visualise, simulate and analyse real-world performance early in the design process to save time and money, enhance quality and foster innovation.

How a company protects itself against hardware failures and supports its staff in the effective utilisation of software has a massive impact on the long term success of any organisation.

Software Support

The Software Support Agreement provided by Computer Aided Business Systems Limited satisfies the operator's demand for comprehensive technical support on your software programs.

A software support contract is essential to ensure full utilisation of your computer system, thereby guaranteeing minimal interruptions to the working day.

Our programmes puts you directly through to our support team who are available to answer your queries. All incoming fault calls are logged, and if an immediate solution cannot be given to your problem, your call will be returned, or, if necessary, an appointment made to come on-site to help resolve the problem.

Autodesk Training

Autodesk believes that life-long learning is important, from academia and throughout your professional career. Autodesk support students and educators as well as professionals. Whether you need education resources, instructor-led, self-paced or online training, Autodesk has you covered.
